Model : No. 0088/III/10

# MQ-9 Reaper

Predator B / Altair

Scale 1/32

The MQ-9 Reaper (originally the Predator B) is a Unmanned Aerial Vehicle (UAV) (also known as a Remotely Piloted Vehicle (RPV)) developed by General Atomics Aeronautical Systems (GA-ASI) for use by the United States Air Force, the United States Navy, Italian Air Force, and the Royal Air Force. The MQ-9 is the first hunter-killer UAV designed for long-endurance, high-altitude surveillance.

The MQ-9 is a larger and more capable aircraft than the earlier MQ-1 Predator, although it can be controlled by the same ground systems used to control MQ-1s. The MQ-9 has a 950-shaft-horsepower (712 kW) turboprop engine, far more powerful than the Predator's 115 hp (86 kW) piston engine. The increase in power allows the Reaper to carry 15 times more ordnance and cruise at three times the speed of the MQ-1.

X

The latest United States Air Force Strike Unmanned Aerial Vehicle (UAV). It is a development and derivative of its brother MQ-1 Predator A. Bigger, faster and even deadlier hunter killer UAV, designed for long flight and high altitude surveillance. USAF has 28 Reapers which 10.5 USD million each unit cost. This paper model is a request from a friend at papermodelers.com forum. I use 1/32 scale, with formers and inner glue flaps or glue tabs, make this model suited for advanced builder.
